FIFABQ COVID-19 Guidelines

As of June 2020

Food is Free Albuquerque will be following all state-mandated guidelines regarding COVID-19. FIFABQ will implement safety precautions as knowledge is acquired.

Safety measures are up to each individual LEAD HARVESTER and may change during each harvest. Our priority is ensuring the safety and comfort of our volunteers as well as the homeowners and community we are serving.

FIFABQ reserves the right to deny harvest if safety requests of the HARVESTER are not followed by the homeowner. This may include, but is not limited to:

- Homeowner remaining a 6-10 foot distance
- Facial masks not being worn
- Tools only being handled solely by FIFABQ volunteers
- Documents not being completed before start time
<online or a hard copy day of>

Final say is up to the Lead Harvester & may change daily.

Thank you for your cooperation as we navigate this new and ever-changing situation.

What should I expect before + during harvest?

Pre-Harvest

- All details of harvest confirmed
- Clean harvesting area of animal waste + hazards
- Communicate any pertinent information to your Lead Harvester (gate codes, etc.)

Harvest Day

- Remain a safe distance from Harvesting Volunteers
- Clearly communicate tree information
- Please make sure all animals are put away
- Lead Harvester will let you know they have arrived
- Lead Harvester reserves the right to end harvest at ANY time and for any reason
- Feel free to ask questions!

Post-Harvest

- Your Lead Harvester will let you know they have finished
- Tell your friends + neighbors
- Expect a follow-up survey + tax receipt via email

Map your tree with **FIFABQ**

Why should I map my tree?

The city is shaded by our tree canopy, which is shrinking. Less shade means hotter temperatures. In partnership with Tree New Mexico, FIFABQ is setting out to track all of the fruit trees in our area. The canopy will be monitored as well as the health of each tree, including the amount of fruit harvested from it annually.

What is done with the information?

It is stored in a private, secure database called TreePlotter. FIFABQ will collect data on the health, productivity, and location of the tree(s).

What do I need to do?

Register at: <http://bit.ly/TreeMaps>
Then sit back and RELAX!

Who can access the data?

Only FIFABQ + Tree New Mexico.

**MONTHLY DONOR
PROGRAM**

Shucker

Shucker : shuck; shucking; shucked (n.)

A Human who gets stuff done.

Our Shuckers know that running a nonprofit isn't easy.

Continued support through monthly pledges allows FIFABQ to provide creative solutions for the 70,000 New Mexican dealing with food insecurity each week. [NMVoices.org]

Support your favorite program today at bit.ly/DonateFIFABQ or by texting FIFABQ to 4-4321.

"I support FIFABQ through monthly giving because they connect our community by redistributing food that would otherwise go to waste."
